REPORT: On 9/06/2011 at 1510 hours, I conducted a Rule 1140 and 1155 joint inspection with AQACS Scott Caso. I met with Mr. Samuel Garnek (714.773.1380), Vice President, who accompanied me during the inspection.

The facility is a brake caliper refurbisher with permitted baghouse and abrasive blasting equipment. I inspected the following equipment:

-G1036 Wheelabrator baghouse pollution control system that was not in operation during the inspection. The equipment appeared well maintained.

-G1037 Wheelabrator abrasive blasting machine that was not in operation during the inspection. The equipment appeared well maintained and was vented through the baghouse.

-An exempt water-based solution cleaning machine that did not contain any VOC materials.

-An Controlled Pyrolysis electrical oven that Mr. Garnek was not sure what it was used for.

I issued NC E10116 to Mr. Garnek pursuant to CA Health and Safety Code Section 42303 to provide a description on the use of the burn-off oven and most recent use.

I did not observe any other violations during the inspection.

On 9/09/2011 I received information from Mr. Garnek stating that the oven is "used to loosen components on the previously cleaned brake calipers".
